**HEALTHY CHICAGO**

Chicago Infant Mortality Rate, 2010-2015

Source: Illinois Department of Public Health, Division of Vital Records

- Definition: Number of infant (under 1 year) deaths per 1,000 live births

- Chicago had a higher rate of infant mortality than the rest of the US in 2015 (5.9 deaths per 1,000 live births as compared to 7.9).[1]

- The infant mortality rate in Chicago has not substantially changed between 2010-2015.

- There are significant racial and ethnic disparities in Chicago's infant mortality rate. Since 2010, Non-Hispanic Black infants have had an infant mortality rate that is approximately three times higher than Non-Hispanic White infants.

- The community areas with the highest rates of infant mortality cluster on the south and west sides of the City, while the lowest cluster on the north side.

- The top causes of infant mortality in Chicago are premature birth and low birth weight, birth defects, maternal pregnancy complications and sudden unexpected infant deaths, including sudden infant death syndrome (SIDS).
